

GripPack Cutter

World's only battery powered cutter for steel or plastic strapping.

Lightweight, easy to use and durable.

Easy to use

Ergonomic, lightweight only 3,4 kgs and glass fiber reinforced nylon casing

Fast operation

Cuts straps up to 1,45 mm thickness

Versatile

Cuts all global strap types, steel and plastic up to 32 mm in width

Safe operation

No lose straps ends - serrated jaws hold tensioned strap

Reduced costs

Cutter can complete 50.000 cycles with easy blade replacement

Compact

Fits into tight spaces unlike traditional manual cutters

GripPack Cutter

World's only battery powered cutter for steel or plastic strapping.

Lightweight, easy to use and durable.

Design, function and operation

Signode's GripPack strap cutter, enhances productivity and operator safety for applications that utilise steel or plastic strapping.

The GripPack cutter quickly and effortlessly cuts through straps up to 32 x 1,45 mm thickness, steel or plastic strapping at one time. It offers two modes of operation - one for non-tensioned strap to maximize cutting speed and one for tensioned strap to enhance operator safety. In the tensioned strap mode, the GripPack cutter holds the tensioned strap in place during cutting and keeps one end of the strap in its serrated jaws after cutting.

The lightweight, durable design uses a single trigger button to operate, which makes GripPack cutter especially easy to use and handle.

Modern 'electric drill' style ergonomics have been used to ensure the tool is comfortable, easy to use, reducing operator fatigue and improving safety and productivity.

Specification and Performance

Weight	3,4 kg (inc. battery)
Strap width	Up to 32 mm
Strap gauge	Up to 1,45 mm
Strapping type	Steel or plastic strapping
Cut rate	240 cuts per charge
Battery	18v 3Ah Bosch Lithium Ion
Recharge time	Full: 30mins; 80%: 15mins
Dimensions	362 x 83 x 184 mm

Durable cutting blade and robust construction

A cutter will do 50,000+ cutting cycles and is easy to replace. An impact resistant outer nylon plastic body protects internal components in the event of accidental falls during usage.

One-handed operation

A single touch trigger button operation for easy access to tight spaces unlike manual tools. Two types of operation, for tensioning loads press once quickly to cut and hold strap. For tension or non tensioned strap, hold down trigger for one step cut and release.

Ergonomic and safe operation

Lightweight, weighing only 3,4 kgs with a balanced drill style grip ensures reduced fatigue when using. An integral LED light illuminates the cutting area and there is an optional handle for added stability when cutting heavy duty straps under tension.

'Fast Charge' lithium-ion battery power

The latest Bosch lithium-ion 18v 3Ah technology enables the battery to be recharged at any time in just 30 minutes, with up to 240+ cuts per charge.

Safer operator use

Gripper holds strap after cutting. No lose straps due to strong serrated jaws that holds highly tensioned strap and protects operator from strap springing back after cutting.

Lower operating costs

Compared to the high cost and operational inefficiencies of compressed air, battery powered GripPack tools offers significant cost savings.

Part of the GripPack family

GripPack Steel Strap Tensioner for 19-32 mm and Sealer for 19 & 32 mm - both battery powered and now the battery powered cutter.
