

MABEG MSP 54 - 2C1S - 1100

Line for one-sided inspection and coding tasks

- M1** Sheet feeder with original MABEG suction head ClassicFeed
- M2** Alignment table
- M3** Precision application table
- M4** Double diverter gate in two cassettes (2C)
- M5** Transfer table
- M6** Sheet stacker for accepted sheets (1S)

Applications (example typical application):

- A1** Inkjet from above (apply codes)
- A2** Inspection by camera-system from above

Brief specification

- Material weight:** 70 to 300 g/m² paper and light cardboard (other values project-specific on request)
- Sheet format:** min. 300 x 300 mm (other values project-specific on request)
max. sheet width: 540 mm
max. sheet length: 750 mm
- Sheet run height:** 1.100 mm
- Stack height:** 900 mm incl. palette
- Speed / Capacity** max. 120 m/min or max. 12.000 sheets per hour
(The production capacity depends on material, sheet size, grammage, climatic conditions, general surrounding conditions)

MABEG MSP 54 - TR - 1B1S - 1100

Line for two-sided inspection and coding tasks

- M1** Sheet feeder with original MABEG suction head ClassicFeed
- M2** Alignment table
- M3** Precision application table (T)
- M4** Second precision application table for reverse side applications (R)
- M5** Diverter gate
- M6** Waste box for rejected sheets (1B)
- M7** Transfer table
- M8** Sheet stacker for accepted sheets (1S)

Applications (example):

- A1** Inkjet from above (apply codes)
- A2** Inspection by camera-system from above
- A3** Inkjet from below (apply codes)
- A4** Inspection by camera-system from below
